**Agenda Item 4: 2013 SOC Update** – John Gunter has emailed the OTWG members the SOC outline. He has been working with SMEs et al on content development. John will start looking for individuals to vet, deliver and facilitate for the 2013 SOC.

**Agenda Item 5: DTS Update** – John Gunter reported to the group that the DTS engineer has resolved or responded to all DTS discrepancies compiled in the initial DTS Discrepancy report. Additional discrepancies received since that time have been compiled and are under review by the DTS engineer. Additionally, he reported that IT has been able to get the SIMINIT application running in the DTS environment, which will enhance our ability to update the DTS model. John introduced Katie Mauldin as the new DTS Engineer.

Ryan Schoppe and Katie Mauldin will be working to develop and test a new DTS model that is expected to be available for the February restoration drill. Ryan Schoppe informed the group that he and Daniel Baker made some enhancements to the inertia and damping values in the DTS to improve generator realism.

**Agenda Item 6: 2013 Registration Update and Waitlists** – Jane Martin stated that the SOCs are currently full with very small waitlists the largest being the Kansas City waitlist with 11 currently. REOPs classes are full with a few available seats remaining. Integrated Marketplace Clinics are mostly full with very few on the wait lists. Topeka has the largest numbers with 17 currently waitlisted for the Generation clinics. The Dallas clinic is currently only available for the original Little Rock registrants. It will open to the general public within the next week. If you know of someone that was enrolled in Little Rock and cannot
attend the Dallas clinic – email that information to Leslie Sink or Michael Daly for enrollment in another clinic.
