Southwest Power Pool, Inc.
webOASIS Training Registration
Additional Sessions

Course Description

The webOASIS training sessions will explain the use and application of the OATI webOASIS and webTrans products. Participants will demonstrate proficiency in accessing the systems, navigating the various displays, and managing Transmission Service Requests (TSRs) in accordance with regulatory and business requirements through hands-on simulation exercise.

Open Access Technology International, Inc. (OATI_148) is recognized by the North American Electric Reliability Corporation (NERC) as a continuing education provider who adheres to the NERC Continuing Education (CE) Program Criteria. NERC CE hours can be awarded to those who are already NERC certified and complete the requirements of the training course.
