URGENT REMINDER: Have the Correct Certificates for OASIS Cutover in June!

This is a reminder to be sure you have OATI certificates in time for the June cutover to the OATI OASIS, which will be home to the SPP OASIS site.

If you currently utilize OATI for certificates, it is encouraged that you have certificates to accommodate all of your OASIS users.

If you do not use OATI certificates for OASIS access and do not have an agreement to have OATI certificates, there are steps that you must complete to be ready for the June transition.

For additional information, refer to the OATI Digital Certificate Instructions.

It is highly recommended the OATI Digital Certificate Instructions are complete no later than March 27, 2009.

If you have any questions, please contact your Customer Relations Representative.
