The Honorable Kimberly D. Bose, Secretary
Federal Energy Regulatory Commission
888 First Street, N.E.
Washington, D.C. 20426

Re: Entergy Services, Inc., Docket No. ER05-1065-000
Correction to the ICT's Quarterly Performance Report

Dear Secretary Bose:

On March 30, 2012, Southwest Power Pool, Inc. ("SPP"), as the Independent Coordinator of Transmission ("ICT") for the Entergy Services, Inc. ("Entergy") system, submitted the ICT's First Quarterly Performance Report for 2012. Subsequently, it has come to SPP's attention that the report incorrectly represents the end-date for the extended two-year term of the ICT arrangement. Accordingly, SPP attaches both a clean and redline version of the corrected page.

The ICT will serve a copy of this correction to all Interested Government Agencies and will make the correction publicly available by posting it electronically on SPP's website and Entergy's OASIS.

If there are any questions related to this matter, please contact the undersigned at the number listed above.

Respectfully submitted,

/s/ David S. Shaffer
David S. Shaffer

Counsel for the ICT

cc: Docket No. ER05-1065 service list

Corrected Page - Clean Version

1. Overview

1.1 Entergy

Entergy Services, Inc. (Entergy) is a service company providing services for the Entergy Operating Companies, which are a part of a multi-state public utility holding company system. The Entergy Operating Companies include Entergy Arkansas, Inc. (EAI), Entergy Gulf States Louisiana, LLC, Entergy Louisiana, LLC, Entergy Mississippi, Inc., Entergy New Orleans, Inc., and Entergy Texas, Inc. Entergy provides electricity to 2.7 million utility customers in Arkansas, Louisiana, Mississippi, and Texas. The Entergy Operating Companies have 15,500 miles of 69 kV – 500 kV transmission lines and move about 23,000 megawatts (MW) of power across the interconnected lines in a 112,000 square-mile area. Entergy also operates more than 40 generating plants using natural gas, nuclear, coal, oil, and hydroelectric power with approximately 30,000 MW of electric generating capacity.

1.2 Independent Coordinator of Transmission (ICT)

On May 27, 2005, Entergy submitted to the Federal Energy Regulatory Commission (hereinafter, FERC or Commission), on behalf of the Entergy Operating Companies, a proposed revision of its Open Access Transmission Tariff (OATT or Tariff) reflecting its proposal to establish an ICT for its energy system and a WPP. In its filing, Entergy identified Southwest Power Pool, Inc. (SPP) as the candidate it had chosen to perform the function of the ICT¹. On April 24, 2006, in Docket No. ER05-1065-000 (hereinafter, ICT Approval Order), the Commission found that SPP, operating as a Regional Transmission Organization (RTO), was sufficiently independent to serve in the capacity of the ICT for Entergy for an initial four-year term. Consequently, the Commission approved the tariff changes filed by Entergy and SPP initiated its duties, as set forth in Attachment A of the ICT Agreement and further defined in Attachment S of Entergy's OATT, on November 17, 2006, with select reliability functions starting on November 1, 2006.

On November 16, 2010, in Docket No. ER10-2748-000, the Commission accepted a revised and restated ICT Agreement that extended the ICT arrangement for an additional two-year term (i.e., expires on November 17 2012).

¹ The ICT operates as a functional division of SPP. Accordingly, unless otherwise noted, references to "ICT" and "SPP" are used interchangeably in this report.
