
FERC RM14-2	Compliance Filing is due. Each ISO and RTO is required (1) to make a filing that proposes tariff changes to adjust the time at which the results of its day-ahead energy market and reliability unit commitment process (or equivalent) are posted to a time that is sufficiently in advance of the Timely and Evening Nomination Cycles, respectively, to allow gas-fired generators to procure natural gas supply and pipeline transportation capacity to serve their obligations, or (2) to show cause why such changes are not necessary. In their responses, each ISO and RTO must explain how its proposed scheduling modifications are sufficient for gas-fired generators to secure natural gas pipeline capacity prior to the Timely and Evening Nomination Cycles (Order Initiating Investigation into ISO and RTO Scheduling Practices and Establishing Paper Hearing Procedures issued in EL14-27 on March 20, 2014; Order No. 809 issued in RM14-2 on April 16, 2015; Notice of Extension of Time issued in EL14-27 on July 1, 2015)	8/4/2015
