

2019 ITP Futures Development and Public Policy Survey

Attachment O of the SPP Tariff requires SPP to identify transmission needs driven by Public Policy Requirements in accordance with the ITP Manual. The ITP Manual states this survey is to be conducted during the future development phase of the study, thus SPP is requesting feedback on drivers to consider for the development of the 2019 ITP Assessment futures at this time.

Please complete the following survey and/or forward to the appropriate contact(s) within your company for completion.

1. Do you, your company, or state have any public policy drivers that you would like to see considered in the development of assumptions for the futures we have in the 2019 ITP Assessment? If so, please describe.
2. Please describe any general industry drivers or assumptions that you or your company would like the ESWG, TWG, and SPC to consider into the futures development for the 2019 ITP Assessment.

As a frame of reference, prior ITP study drivers have included the EPA's Clean Power Plan, drought conditions, and competitive wind. Drivers for the future development should not include any current public policy mandates/goals set forth by your company or state in the form of renewable policy standards, as these will be accounted for during the renewable policy review. Information on the renewable policy standard implementation can be found in Section 2.2.1.3 of the [ITP Manual](#)¹.

Additional reference information on this request and the current status of the 2019 ITP Assessment can be found in the following files [here](#):

- 4. 2019 ITP Schedule
- 5. 2019 ITP Scope
- 6. 2019 ITP Futures

Please provide feedback by **Friday, August 4** through the [SPP Request Management System \(RMS\)](#) using the 'Integrated Transmission Planning (ITP)' Quick Pick and 'Data Submission' Subtype. Results of the survey will be discussed at the August 16-17 ESWG meeting.

[SPP RMS](#) is the preferred method for receiving all inquiries and survey responses. Click on [this link](#) and then "Register Now" if you are not already registered.

- Choose Quick Pick "Integrated Transmission Planning (ITP)"
 - Auto-populated as Request Type "ITP Submittals"
 - Choose Subtype 1: "Data Submission"

¹ The ITP Manual was approved by the MOPC on July 11, 2017; it will be effective October 1, 2017.
