INTRODUCTION

External stakeholders interacting with Southwest Power Pool's (SPP) Integrated Marketplace are required to provide data to and accept data from SPP systems. This document provides an inventory of data points per system and information on the methods used for exchange of the data.

Note: In this document, the term "external stakeholders" refers to any and all stakeholder types which could include Market Participants, members, customers, Transmission Owners/Operators, Transmission Customers, Meter Agents, Generators, Load Serving Entities, vendors, etc. Not all data points are accessible by all types of external stakeholders. Please contact Customer Relations for more information. For regulatory purposes, SPP may exchange data with agencies not considered "stakeholders" in the context of this document (i.e., FERC, state commissions, etc.).

External stakeholder data points are accessed using the interface types listed and illustrated below.

- User Interfaces (web-based UI)
- Web Services (programmable API)
- FTP (File Transfer Protocol)
- ICCP

For each data point in the Data Point Inventory, the following information is specified:

- Data Point: The name/description of the data point
- Interface Type: The type of interface used for data exchange. The following interface types are utilized.
 - User Interface (UI) – Graphical user interface allowing stakeholders to interface with Integrated Marketplace systems
 - Programmable (API) – Programmable interfaces (web services) allowing stakeholders to interface with Integrated Marketplace systems.
 - Inter-Control Center Communications Protocol (ICCP) – Inter-utility real-time data exchange method
 - File Browser – UI-based file browsing/download
 - File Transfer Protocol (FTP) – Programmable access to data files via the standard FTP protocol used for the transfer of computer files between a client and server
 - Request Management System (RMS) – UI allowing stakeholders and SPP to capture requests, questions, suggestions or problems. The RMS allows users to view issues, submit requests and search or look up submitted requests.
 - Email
- Stakeholder Action
 - Receive – SPP provides the data point to the stakeholder
 - Submit – Stakeholder provides the data point to SPP
 - Query – SPP publishes the data point for Stakeholder retrieval

The data points per system/category are inventoried below.

DATA POINT INVENTORY

BALANCING AUTHORITY

DATA POINT	INTERFACE TYPE	STAKEHOLDER ACTION
Resource Deployment	ICCP	Receive
Meter Data [Intervals]	ICCP	Submit
Actual Tie-line Meter Data (Transmission Owners only)	ICCP	Submit
Conforming Load Data (Actual Load)	ICCP	Submit
Wind Farm Weather Data	ICCP	Submit
Non-Conforming Load Data (Estimated Load)	ICCP	Submit

CREDIT

DATA POINT	INTERFACE TYPE	STAKEHOLDER ACTION
