# INTRODUCTION

---

This document provides a listing of user interface guides available for Integrated Marketplace, Western Reliability Coordination Service (West RC), and Western Energy Imbalance Service (WEIS) user interfaces (UIs).

## FINDING THE DOCUMENTS

---

Technical documents are housed within the **Reference Documents** section of the Change Working Group page on SPP.org.

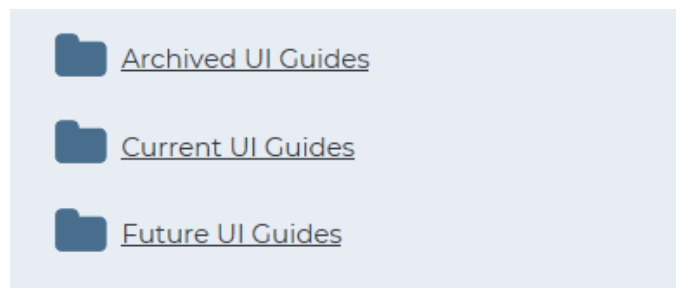

*SPP.org > Organizational Groups > Change Working Group > Reference Documents*

The **Reference Documents** folder and associated subfolders house a variety of documentation. SPP technical documentation is located within the **User Interface Guides** subfolder.

*SPP.org > Organizational Groups > Change Working Group > Reference Documents > Technical Reference Documents > User Interface Guides*

To facilitate the publication of incremental versions of the technical documents, the following folder structure is utilized.

The **Current** folder contains documentation for current production versions of systems and services. The **Future** folder contains documentation for soon-to-be-production versions of systems and services. The **Archived** folder contains retired versions of the documents.

Note: For illustration purposes the folders used for UI guides are shown here. The same approach is used for the publication of all technical reference documentation (i.e. technical specifications, business rules, etc.).

## USER INTERFACE GUIDES

---

DOCUMENT	DESCRIPTION	RTO/RC/WEIS?
