

## 2019 ITP Recommended Renewable Siting Plan Posting

The SPP-recommended 2019 ITP renewable siting plan has been posted to GlobalScape for stakeholder review. The methodology approved at the April 25 ESWG meeting, feedback from the preliminary renewable siting plan, and the exception sites approved at the May 16-17 ESWG meeting were used to develop this recommended siting plan. All approved exception capacity for wind and utility solar replaced capacity at the lowest ranking sites for the corresponding technology.

SPP staff requests that stakeholders review this siting plan to ensure the methodology was implemented as expected. SPP Staff will solicit a vote to approve the renewable siting plan on the May 31 ESWG conference call.

**Stakeholders should submit any questions or concerns via SPP RMS under the “ITP-Data Submission” Quick Pick.**

### Material Disclaimer

#### Critical Energy Infrastructure Information

**For stakeholders who do not have access to this posting material, independent preferences and information for your company will be considered as they are submitted through RMS under the “ITP-Data Submission” Quick Pick.**

### Information for obtaining posted data:

In order to obtain access to these documents in [GlobalScape](#), stakeholders must provide SPP with the following signed [confidentiality agreements](#). Instructions can be obtained by clicking on the link. Please submit these forms via [RMS](#) through the “Request Globalscape Access” Quick Pick. After the executed confidentiality agreement is received, an account will be created for the requester on [GlobalScape](#). An email with instructions for logging in will be sent to the requester. For those that already have [GlobalScape access](#), no additional action is necessary.

As a reminder, instructions for requesting access to the model information can be found on the SPP website [here](#).

### *For users who have signed an SPP competitive-duty NDA:*
