

## 2019 ITP Constraint Assessment Final Posting for Approval

An updated list of constraints for the 2019 ITP have been posted to [GlobalScape](#) for the Transmission Working Group’s (TWG) approval. During the September 14-21 review period, SPP inadvertently did not review one stakeholder’s feedback submission and as a result, an additional 69 kV contingency is included in the constraint assessment and will be evaluated in the SPP BA reliability assessment consistent with a TWG-approved motion from the August 15-16 meeting. Additional stakeholder feedback on constraint ratings was also submitted outside the review period that was able to be incorporated, which is highlighted in green in the posted workbook.

The posted list of constraints contains the updates noted above. SPP will solicit a vote from the TWG via email today for approval of:

- BA Economic Model Constraints (including 69 kV Constraints)
- 69 kV contingencies to be used for the BA reliability needs assessment
- Additional generator outlet facilities (GOFs) identified during the constraint assessment as posted September 28

### Material Disclaimer

**CONTAINS CONFIDENTIAL AND PROTECTED MATERIAL NOT AVAILABLE TO COMPETITIVE DUTY PERSONNEL – DO NOT RELEASE**

### Information for obtaining posted data:

In order to obtain access to these documents in [GlobalScape](#), stakeholders must provide SPP with the following signed [confidentiality agreements](#). Instructions can be obtained by clicking on the link. Please submit these forms via [RMS](#) through the “Globalscape Access Request” Quick Pick. After the executed confidentiality agreement is received, an account will be created for the requester on [GlobalScape](#). An email with instructions for logging in will be sent to the requester. For those that already have [GlobalScape access](#), no additional action is necessary.

As a reminder, instructions for requesting access to the model information can be found on the SPP website [here](#).

These files can be found on [GlobalScape](#) under “ITP→ ITP→ NCD (CEII, RSD)→ NDA→ 2019 ITP” in the “[Constraint Assessment Review](#)” folder.

### For users who have signed an NDA:

File Name	Description
2019 ITP Constraint Assessment Recommendation.xlsx	Workbook containing SPP permanent flowgates, SPP BA model constraints, and 69kV constraints to be reviewed for the 2019 ITP cycle
