

Project Documentation

- [API/XML Specifications](#)
 - A draft version of the API/XML technical specifications for both Market and Transmission will be published on SPP.org by 06/25/2018; a final version will be posted on 10/01/2018
 - [Portal Application Role Reference Guide](#)
 - This document provides the roles available for exchanging data with SPP systems. This information is used by LSAs to assign roles to users and systems in the Portal.
 - [SSRP Portal Role Mapping](#)
 - As part of this project, Portal roles were renamed and new roles created. This document provides a mapping of current system roles to new system roles to aid LSAs in determine what changes they need to make to user/system permissions.
 - [Settlement User Interfaces Guide](#)
 - This guide describes how to submit, and if applicable, approve input data, register for event notifications, view reports and Settlement results (e.g. invoices, statements) via UIs available in the Marketplace Portal.
 - [Integrated Marketplace Protocols](#)
 - Provides Market Participants, Asset Owners, Meter Agents, and Shadow Settlement Vendors with the calculation details needed to shadow market settlement charges and credits (changes to this document are tracked via the [SPP Revision Request](#) process)
 - [Transmission Settlement Business Practices](#)
 - Documentation created for this project to provide Transmission Owner, Transmission Customers, and Shadow Settlement Vendors with the details needed to shadow transmission settlement charges and credits in the new system (This document is not currently part of the SPP Revision Request process.)
 - [Settlements Member Data Exchange \(UI/API\) Validations](#)
 - Will be created with this project to provide members with a list of validations the SMS will perform upon submission and query (download) of Settlement data.
 - [SSRP Test Approach](#)
 - This document provides on overview of SSRP Member Testing including test phases, objectives, supporting documents, and communication plan.
