

Good afternoon stakeholders,

## 2023 ITP Base Reliability (BR) Powerflow Approved Final Model Information

- **Note:** After the 2023 ITP base reliability (BR) powerflow models were posted and voting had begun, staff identified that the Anadarko-Gracemont 138 kV circuits 1 and 2, which are subject to the SPP board approved re-evaluation in the 2023 ITP, were not reverted back to existing system configuration in the BR powerflow. Based on this information, staff has updated the 2023 ITP BR powerflow models. In accordance with RR500, the data was submitted on time, but was omitted by SPP and has been incorporated as a model correction update.
