23. **Staff** NTC 210515 & 210706 SPS AQ withdrawal Tammy Bright (SPP)

CLOSING

There was one new MOPC action item related to RR493 approval: Staff to conduct an impact assessment of implementing Option 2 as recommended by the TWG and come back to January MOPC with results and an associated Revision Request.

Lanny informed the group about a self report SPP filed with FERC. In Feb. 2023, SPP discovered it had incorrectly assigned Kansas City Board of Public Utilities (KCBPU) as a Transmission Owning member instead of a Transmission Using member for calculating MOPC votes in the eBallot tool. The only MOPC vote that would have had a different outcome was its Oct. 2022 vote on RR516, which implemented SPP's policy to increase the planning reserve margin increase. SPP reported the vote passed with 66.29% approval. If KCBPU had been correctly classified, RR516 would have failed with 65.63% approval. In Oct. 2022, the RSC unanimously approved RR516 as implementing the policy it had previously approved in RR509. Even if RR516 had been correctly reported as failing at MOPC, this would not have changed the RSC's approval of RR516, as the RSC has the ultimate authority over whether the policy should have been approved. The MOPC vote for or against RR516 is advisory to the RSC and to the SPP Board. This error has been corrected.

Lanny reviewed upcoming MOPC meetings and reported that the Oct. meeting in Little Rock will start at 10:00 a.m. CT rather than 1:00 p.m. due to the large number of resource adequacy items up for approval.
